DETAILED ACTION

Information Disclosure Statement

1. The information referred to in the information disclosure statement filed September 22, 2001 has been considered as to the merits.

Claim Rejections - 35 USC § 112

2. Claims 1-19 and 21-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Line 4 of claim 1 is grammatically vague. Note the recitation "interlocking means define on a first and an opposing second sides". Line 7 of claim 1 is grammatically vague. Note the recitation "said interlocking mean of a first said seat module". Claims 2-11 are indefinite since each depends from an indefinite claim. Line 2 of claim 12 are grammatically vague. Note the recitation "a first and a second engagement members". Line 3 of claim 12 is grammatically vague. Note the recitation "a first and an opposing second sides". Claims 13-19 are indefinite since each depends from an indefinite claim. In line 2 of claim 21, it is unclear what feature is represented by the recitation "is tiled upward". Claims 22-25 are indefinite since each is dependent from an indefinite claim.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 12 and 20, as best understood with the above cited indefiniteness, are rejected under 35 U.S.C. 102(b) as being anticipated by Lazaroff et al (4,244,621). Note the support (26), interlocking means (at 18 and 24), fasteners (30 and/or 32), tab (38), and contacted surface (40).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 13, 14, 16-18 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lazaroff et al (4,244,621) in view of Kornbluth (3,116,090).

Lazaroff et al shows all claimed structure of the instant invention with the exception of the recessed area.

Art Unit: 3636

Kornbluth conventionally teaches configuring a seat assembly with a recessed area (19) for an indicia bearing plate.

It would have been obvious to one having ordinary skill in the pertinent art at the time of the instant invention to modify Lazaroff et al in view of Kornbluth by configuring the seat assembly with a recessed area. Such provides means for securing an indicia bearing plate for identifying the seat.

Allowable Subject Matter

7. Claims 2-11, 15, 19 and 22-25 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112 set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Seat assembly modules are shown by Karl et al (5857742), Henebry et al (3482874), Duckett et al (3531157) and Tipton et al (3702204).
